PROFESSIONAL SUMMARY

At Kenzie Academy, I participated in numerous projects spanning both front-end and back-end development, with a strong emphasis on teamwork. I began with projects in plain JavaScript and CSS, progressing to React and libraries such as Axios and Zod. On the back-end, I developed RESTful APIs using Node.js with Express and Prisma, as well as Python with Django, including the implementation of JWT authentication, custom permissions, and complex data manipulation with pivot tables. Advanced English - C2

HABILIDADES TÉCNICAS E INTERPESSOAIS

Basic UX understanding / UX fundamentals;	Backend interaction through APIs (Application Programming Interfaces);	TypeScript;	Work Ethic;
Motion Design;		Object-Oriented	Attention to Detail;
Figma;	NodeJs;	Programming (OOP);	Empathy;
React;	Express;	Django;	Continuous Learning;
Building RESTful APIs;	Prism;	Effective Communication;	Critical Thinking;
		Teamwork;	

EDUCATION

Estácio

Ciências da Computação, 2023 - 2026

Kenzie Academy Brasil

Desenvolvimento Web Full Stack, MAR/2023 - MAI/2024

WORK HISTORY

Replenisher | DIA%

SEP/2019 - DEC/2019

- As a supermarket replenisher, I not only further developed my time management and organization skills but also enhanced my communication and customer service abilities, interacting with customers and ensuring the rapid replenishment of products on the shelves.

Industrial Painting Assistant | Emtep

FEB/2019 - JUL/2019

- As an industrial painting assistant, I not only prepared surfaces but also developed time management and work organization skills, ensuring that structures were ready for painting as quickly as possible, streamlining the process for the painter.

PROJECTS

Kenzie Hub

Developed a complete CRUD for technology management in a web project (Kenzie Hub), using React, SASS, and the Kenzie Hub API. Implemented create, read, update, and delete functionalities for technologies, as well as interactive and responsive modals. Demonstrated skills in state management, form management (React Hook Form), and consumption of RESTful APIs.

Technologies Used:
- Front-end: React, SASS, React Hook Form, Toastify, Framer Motion API: Kenzie Hub API (RESTful) Other: Git (version control)

Kenzie Cars

Developed a RESTful API using TypeScript, Express, and PostgreSQL to manage a car catalog. Implemented CRUD operations, data validation with Zod, and dependency injection with Tsyringe. Achieved comprehensive test coverage using a testing framework. Leveraged Prisma ORM for efficient database interactions.

Technologies Used:
- Back-End: Python/Django

CURSOS COMPLEMENTARES

UI/UX Design (Udemy - 2024)

GSAP/Motion Design (Udemy - 2024)

Angular 2 (18) (Udemy - 2024)

Java (Udemy - 2024)
